(54) FORMATION OF TUBULAR CORD TOPPING BODY

(57) Abstract:

PURPOSE: To economically provide a tubular cord topping body of high quality by a simple apparatus.

CONSTITUTION: A nozzle metal element 7 having an annular outlet part 6 and the guide ring 11 attached to the nozzle metal element and forming a topping chamber 12 having guide grooves 10 guiding respective tire cords 2 and communicating with the extrusion end of an extruder 5 extruding a plastic material are arranged to the extruder 5 and the tire cords passing through the guide grooves are coated with the plastic material supplied from the extruder in the topping chamber to form a tubular tire cord topping body 1.

LEGAL STATUS

[Date of request for examination] 20. 11. 1996

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2843509

[Date of registration] 23.10.1998

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against
examiner's decision of rejection]

[Date of extinction of right] 23.10.2003
